**2018 Budget Seeks Cooperative Approach to Address ATV Trail Project**

Conception Bay South, NL – Council has heard the concerns raised by ATV riders in the community and will work in collaboration with them to initiate a committee focused on the interests of ATV users in the town.

Mayor Terry French noted, “The Town of Conception Bay South recognizes that while its commitment to the creation of a formal ATV bypass route has been genuine, it is obvious that the current approach is not turning out desired results. Council is listening to ATV users and is dedicated to working with them on a community-driven initiative to help address their concerns.”

Council has committed \$15,000 in its 2018 budget to help establish a formal working group, which will bring together stakeholders representing various interests. These stakeholders will work together to bring forward suggestions for helping solidify the tourism potential associated with this project and develop an action plan for off-road trail tourism within the region.
